WARNING

This document contains information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793 and 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive information in the designated control channels. Its security must be maintained in accordance with regulations pertaining to TALENT-KEYHOLE Control System.

## INTRODUCTION

This publication provides preliminary mission data, Greenwich Mean Time of passes, correlation of photographic coverage with WAC Chart Areas, coverage plots, and preliminary data for Mission 1109-1, dated 4-11 March 1970 (GMT).

Plot sheets are arranged by geographic areas as indicated by the index tabs. Coverage of the Eurasian land mass is divided into days to eliminate illegible overprinting.

Plots for the forward and aft cameras are portrayed as stereoscopic and/or monoscopic passes. Stereo passes will be shown with the forward-looking camera frame numbers inside the pass outline and the corresponding aft-looking camera frame numbers outside the pass outline. In the event of monoscopic coverage, only the frame numbers of the operative camera will appear. The relative location of photographs falling between the numbered frames may be approximated by interpolation.

All frames are indicated on the plot sheets, regardless of water coverage, total cloud cover, or a complete lack of imagery.

PRELIMINARY MISSION DATA

Mission Number: 1109-1  
Launch Date/Time (GMT): 4 March 1970/2215  
Photo Dates (GMT): 4,5,6,7,8,9,10,11 March 1970  
Recovery Date/Time (GMT): 12 March 1970/0104Z  
Operational Photo Passes: 36  
Operational Altitude Limits: 84 - 103 Nautical Miles  
Photo Scale Range: 1:255,024 - 1:312,928  
Operational Ground Coverage (Fwd and Aft):  
a. Linear Nautical Miles: 46,008  
b. Square Nautical Miles: 5,981,040

Frames:

- a. Operational  
Fwd-Looking 2,873  
Aft-Looking 2,878
- b. Stellar 4,846
- c. Index 2,423

Operational Imagery Footage (Fwd and Aft): 14,245

Anomalies: No major anomalies occurred during this mission.

Vehicle Attitude: Normal.

Image Quality:

Main Cameras - The overall image quality of the fwd and aft looking camera records is variable. At magnifications above 25X, most imagery has an out-of-focus appearance. In addition, a three-quarter-inch wide band of out-of-focus imagery is present on frames 3 and 4 of most passes. This area is located approximately 12 inches from the take-up end of the frame and occasionally extends across the width of the format. This area is very similar to that encountered on the Mission [REDACTED] record.

25X1D

Index Camera - The index camera functioned properly throughout the mission and provided image quality comparable to that attained on recent missions.

Stellar Cameras - The stellar camera operated throughout the mission. Approximately 10 starboard and 30 port stellar images can be detected throughout the mission.

Cloud Free Coverage: Approximately 80 percent of the entire mission is cloud free.

GREENWICH MEAN TIME

These times are derived from preliminary data and cannot be verified at this time. They are carried to the nearest whole minute.
